Veya 48 V Track System

Customised design simply clicked

The Veya track system is the ideal solution for your stylish and flexible lighting ideas.
The minimalistic, **extra-flat rail** blends harmoniously into any living space. Thanks to **tool-free click-on installation** you can **easily attach and shift** spots, pendant luminaires and light bars on the rail **into the position of your choice.**

Installation is flexible on the **wall or ceiling**. **High-quality aluminium** in elegant black matt gives the system a modern, elegant look.

Whether you prefer to put together your system individually or start off with a convenient basic set: **Veya adapts to every room situation** and creates impressive light accents with only one power outlet.

Conveniently switch your entire system using the wall switch (On/Off) or select specific luminaires with the special **white light control** (tunable white function) and **dimming function**. Using the remote control, you can create your perfect lighting atmosphere with variable dimming, from warm white to daylight white.

It's so easy to plan your customised Veya track system

The choice is yours:
Start off very easily with our convenient basic set – this contains everything you need to get started: two rails, two connectors and one power infeed. This allows you to get going right away and expand your system gradually.

Or you can directly put together your individual system for yourself.

Choose from:

- 1 m long rails,
- Connectors for custom shapes (for ceiling or wall mounting),
- Luminaires such as spots, pendant luminaires or light bars

When selecting the luminaires, you decide how you would like to control your system:

- Classic control via the wall switch (On/Off),
- In addition to the wall switch, via remote control if you select luminaires with white light control (tunable white function) and dimming function. This allows you to create your own custom lighting atmosphere, from cozy warm white to lively daylight white.

Tip: When choosing the luminaires, make sure to select your preferred control option.

Veya basic set

The set contains two rails, one I connector and one L connector as well as a power infeed. Combine the basic set with matching luminaires for your own personal lighting solution!

Basic Set
max. 100 W
230 V/48 V, incl. 100 VA
⬍30 ⬌380 ⬈24 mm ⬌1.47 m
▦ Aluminium/Plastic
95735

Veya power infeed

You can connect the power infeed at any point on the system – the 1 m connection cable to your power outlet provides you with flexible mounting options.

The ceiling canopy is included in the delivery.

100 W Cable Feed
max. 100 W
230 V/48 V, incl. 100 VA
⬍30 ⬌380 ⬈24 mm ⬌1.47 m
▦ Aluminium/Plastic
95721

Veya rails

The rails are extremely flat with an installation height of just 6 mm and can be trimmed independently as needed. Overall, a system length of up to 24 m is possible. End caps are included with every rail.

Veya remote control

With the remote control, you can use **variable dimming** and adjust the colour temperature of all compatible luminaires from warm white to daylight white. The luminaires can be distributed into four groups and controlled together or individually.

Convenient fast buttons enable direct access to dimming levels (10%, 20%, 50%, 75%) and colour temperatures. There is also a timer function that automatically switches off the light after 10, 20, 30 or 60 minutes.
